

# How much is your refrigeration equipment costing you?

## Inefficient refrigerators & freezers waste money and energy

- Over their full lifetime, commercial refrigerators and freezers cost more to operate than they cost to purchase.
- Inefficient equipment can cost you 25-55% more than standard equipment in unnecessary and avoidable energy use.

## PSE's rebates for refrigerators & freezers can help

- Qualifying equipment uses much less energy than standard equipment models.
- PSE offers rebates of \$125 to \$200 per unit for qualified refrigerators and freezers.
- Rebate amounts vary depending on unit size.
- Rebates are available for qualified solid-door, reach-in and glass-door models.

## Solid-door, reach-in refrigerators & freezers

Equipment type	1 Door	2 Door	3 Door
Refrigerator	\$125	\$150	\$175
Freezer	\$150	\$175	\$200

Qualifying solid-door, reach in units meet the Consortium for Energy Efficiency (CEE) Tier 2 standards. For links to qualifying models visit the "For Your Business" section on PSE.com.

## Glass-door refrigerators

Less than 19 Ft <sup>3</sup>	19 to 30 Ft <sup>3</sup>	>30.1 to 60 Ft <sup>3</sup>	Greater than 60 Ft <sup>3</sup>
\$125	\$150	\$175	\$200

Qualifying commercial glass-door refrigerators are qualified using ASHRAE standard 117-2002 at  $38 < F \pm 2 < F$ . For links to qualifying models visit the "For Your Business" section on PSE.com.

For more information on these and other rebates offered by Puget Sound Energy call a PSE Energy Advisor at 1-800-562-1482 or visit the "For Your Business" section on PSE.com.
